SUMMARY

Senior Business Analyst with experience in business intelligence, automation, forecasting, and operational analytics. I support global leadership with reporting and analysis used to understand performance, identify problems, and make business decisions. Strong experience using Python, AI tools, Excel, and data visualization to automate manual processes and turn complex operational data into useful reporting.

PROFESSIONAL EXPERIENCE

🕒 Senior Business Analyst, Ariba Network Operations

SAP Ariba — Herndon, VA | May 2020 – Present

- Provide business intelligence and analytics for 60 managers globally, supporting decisions around performance, productivity, revenue, staffing, and operational priorities.
- Built and manage a portfolio health reporting program for 20+ global managers, consolidating multiple operational data sources into individualized dashboards with approximately 60 pivot tables, charts, and performance metrics.
- Developed Python automation to generate customized monthly dashboards for individual managers, including data preparation, business logic, manager-level filtering, workbook updates, pivot refreshes, file protection, and report creation.
- Use Python and generative AI tools to automate recurring analytical work, troubleshoot reporting processes, and build tools that would otherwise require significant manual effort.
- Combine and analyze data across onboarding, catalog, integration, transaction, backlog, revenue, and customer datasets to provide a more complete view of operational performance.
- Develop and maintain KPIs covering network revenue, productivity, supplier enablement, transaction readiness, escalations, aging, and customer performance.
- Forecast onboarding, catalog, integration, and other network activity to support capacity and resource planning.
- Analyze operational trends and bottlenecks to identify areas for process improvement and management intervention.
- Led a cost-benefit analysis used in negotiations for a third-party supplier enablement contract.
- Partner with operations, portfolio management, product, and leadership teams on reporting requirements, ad hoc analysis, and process improvements.

🕒 Senior Manager, Global Supplier Program Coordinator

SAP Ariba — Pittsburgh, PA | April 2018 – May 2020

- Led a team of project managers providing supplier enablement strategy and consulting for customers implementing SAP Ariba solutions.
- Oversaw a global portfolio of approximately 600 buyer programs connecting thousands of suppliers each year.
- Built a global capacity planning tool to forecast workload and headcount needs.
- Developed dashboards used to track employee performance, customer activity, and operational results.
- Established a Quality Management Specialist role and implemented a Qualtrics-based customer satisfaction program.

• **Senior Manager, Seller Enablement EMEA**

SAP Ariba — Prague, Czech Republic | February 2017 – January 2018

- Led multiple teams responsible for connecting approximately 18,000 suppliers to buyer customers across EMEA.
- Introduced standardized customer scorecards and action plans to improve visibility into program performance and customer satisfaction.
- Worked across global teams to standardize processes and share best practices.

• **Manager, Supplier Program Coordinator**

SAP Ariba — Pittsburgh, PA | June 2015 – February 2017

- Planned and executed the migration of more than 95 projects to a new CRM platform.
- Worked across teams to design management dashboards and improve customer reporting.
- Received SAP Ariba University's Most Innovative Idea of the Year award in 2016.

• **Supplier Program Coordinator**

SAP Ariba — Pittsburgh, PA | July 2014 – June 2015

- Managed supplier enablement projects across North America, EMEA, and APAC.
- Served as a team subject matter expert and supported peers on complex projects.

• **Quality Control Supervisor / Quality Control Analyst**

ServiceLink — Coraopolis, PA | December 2008 – July 2014

- Researched property issues using appraisal, tax, assessor, plat map, and property-record information and prepared findings for banking clients.
- Managed UAT for a two-year technology implementation that resulted in the successful launch of a new system.
- Reworked system rules that reduced the dispute rate by approximately 5% and generated about \$50,000 in annual savings.
